## Introduction

Pokémon Uranium Version is a fan-game created by ~JV~ & Twitch, using RPG Maker XP. It takes place in the Tandor Region and features 166 unique Fakemon.

In addition, there are 8 official Pokémon that received new forms in this project.

There are also 14 Fakemon that were either scrapped during development or removed in an update.

This project has been mostly completed and is still being updated. Some of the Fakemon documented here have not yet been implemented; those are marked with a (β).
